PRODUCT

weberad cure Y 20 is a water based, advanced copolymer formula, curing compound. It controls water retention and evaporation rates in newly placed concrete to provide added strength and protection. When water can't evaporate quickly, the result is a stronger, more durable substrate that has a higher compressive strength. The concrete will resist shrinkage that is normally associated with the curing process, as well as cracking or other damage that can result from seasonal contraction and expansion.

SCOPE OF USE

- Exterior and interior, horizontal & vertical concrete surfaces
- Pre-cast or pre-stressed members
- Cure freshly poured concrete
- Residential, commercial and industrial applications
- Parking structures, driveways, patios, walkways
- Manufacturing, assembly and warehouse facilities

CHARACTERISTICS	
Appearance	White liquid
Specific gravity	Approx. 1
pH	7.5±1
Color	Transparent when dried
Chloride	Free

INSTRUCTIONS FOR USE

On fresh concrete or rendering as soon as the gloss of the surface becomes mat, and the bleeding stops, **weberad cure Y 20** is sprayed on the surface using a hand operated spray gun. **weberad cure Y 20** can be applied as well by roller or brush. In case of over coating, it is recommended to check the adhesion & compatibility of the new coat and concrete surface treated with **weberad cure Y 20** before application.

weberad cure Y 20 allows direct application of several coatings as per below*:

- Bituminous emulsions
- Acrylic coatings
- Water based emulsion paints
- Epoxy resin coatings
- Polymer modified cement

**A trial test to confirm the adhesion of the coating is always recommended.*

APPLICABLE STANDARD

ASTM C 309 type 1 class B.

CONSUMPTION

App. 0.2kg/m².
